

FAHIM KHAN

Senior Software Engineer

Target role: Senior Software Engineer — Platform Engineering

fahimkhan20148@gmail.com | +971 50 728 6133 | linkedin.com/in/fahim-khan-232533346 | Abu Dhabi, UAE

Profile

Senior Software Engineer with 8+ years of system design and software architecture for high-performance distributed systems, microservices, and AI/agent tooling across fintech and applied AI. Targeting **Senior Software Engineer — Platform Engineering**: service ownership, infra automation, and reliability for shared platforms. Headline impact: cut infrastructure cost **50–90%** and collapsed a **12-month** migration to **3 months** while shipping zero-downtime cutovers for tier-1 banking. Leadership through architecture reviews, mentoring, and cross-team coordination. Core languages: **Rust, Go, TypeScript**.

Core Competencies

Languages	Platform Engineering	System Design	Docker / Kubernetes
Rust	Service Ownership	Architecture	AWS / CI/CD
Go	Infra Automation	Distributed Systems	SLOs / Observability
TypeScript	Event-Driven / Queues	LLMs / Agents / RAG	GraphQL / PostgreSQL

Work Experience

Software Engineer

Mar 2025 – Present

Presight AI · Abu Dhabi

- Platform engineering: built a Go PaaS that provisions fresh VM clusters into production-ready Kubernetes — kubeadm/kubectl bootstrap, CNI networking, namespaces, and required cluster tooling for service ownership by product squads.
- Event-driven microservices and LLM agent pipelines (MCP, tool-calling); cross-team coordination with **3** product squads (~**15** engineers in a ~**40**-person eng org) — ops ~**25 hrs/week** → ~**15 hrs/week (40%)**.
- Service ownership for inference APIs (Rust / NestJS) on Docker/Kubernetes: SLOs, on-call, observability — **99.9%+** uptime on ~**2M** requests/month, MTTR ~**45 min** → **<15 min**.
- Infra automation and architecture reviews for CI/CD / independent deploys across squads — release cycle **10 days** → **4 days (60%)**.

Tech: Go · Rust · TypeScript · Kubernetes · kubeadm · Node.js · NestJS · GraphQL · Docker · LLMs · MCP · React · Next.js

Software Engineer

Apr 2024 – Jan 2025

D4 Insight · Dubai

- Platform engineering: service-discovery redesign (Java→Rust/Axum/Tokio) via architecture reviews with a ~**12**-person platform/fintech delivery team and bank stakeholders; **6→3** replicas, p99 **300ms** → **<50ms**, hosting cost halved.
- Service ownership of reverse-proxy and traffic routing with event-driven fan-out, queues, and backpressure — **10,000+** concurrent connections at ~**5k** RPS, stable p99.
- Infra automation for Playwright/Appium CI; mentoring **4** engineers on SLOs/on-call — **1** incident in six months across ~**50** weekly releases; coverage **45%** → **90%**, regressions **–65%**.
- Cross-team coordination with Emirates NBD eng (~**8** partner contacts) on interbanking REST/API integrations (**12+** endpoints, ~**8k** daily settlement messages); reconciliation **2 days** → **same-day**.

Tech: Rust · Axum · Tokio · Node.js · MongoDB · Playwright · Appium · Finacle · Angular

Software Engineer

Mar 2023 – Nov 2023

Egen Solutions Inc · Remote

- Infra automation: RAG / LLM pipeline (GPT-3.5) migrating Selenium→Playwright; mentoring a pod of **3** engineers (~**400**-test suite) inside a ~**25**-person Bridgecrest eng org — **12 months** → **3 months**.
- Service ownership of Apollo GraphQL federation across loan, payments, and customer microservices (**6** services, ~**10** service owners) — **35%** fewer API round-trips.
- Platform engineering for AWS CI/CD (GitHub Actions) with automated rollback and observability — **daily** deploys (~**20/month**) from **weekly**; architecture reviews for squad standards.

Tech: TypeScript · NestJS · Apollo GraphQL · AWS · GitHub Actions · Dynatrace · GPT-3.5 · Playwright

Software Engineer

Sep 2020 – Jan 2023

Segment Hub Technologies · Mumbai

- Platform engineering / service ownership: Node.js→Rust (Axum) API microservices with PostgreSQL and queue-backed jobs for a ~10-engineer product team — **60%** lower server cost (**8**→**3** instances), **10,000+** connections, sub-50ms p99.
- Cross-team coordination with product and support (~6 stakeholders) on first LLM / GPT-3 RAG rollout (~5k-doc corpus) — tickets ~200/mo → ~150/mo (–25%), onboarding ~30% faster.
- Infra automation for mobile CI delivery (Ionic/Capacitor) on shared REST/GraphQL APIs — **40%** mobile growth from ~2.5k MAU.

Tech: Rust · Go · TypeScript · Axum · PostgreSQL · NestJS · AWS · GPT-3 · Ionic · Capacitor

Software Engineer

Jan 2018 – Aug 2020

Pawzeeble · Mumbai

- Service ownership of geospatial “nearest clinic” (PostGIS + K-d tree) for a ~6-engineer startup — ~1,200 clinics, ~50k queries/day, **10x** compute cost reduction; retired a dedicated geo-service.
- Platform engineering for event-driven notification/booking microservices with durable queues — **2,000+** concurrent bookings, p95 under **200ms** (from ~1.2s).
- Cross-team coordination of web and mobile delivery from one Ionic/Capacitor codebase (**3** platforms, **2** client teams) — **60%** less maintenance vs native forks.

Tech: TypeScript · NestJS · Koa · PostgreSQL · PostGIS · Angular · Ionic · Capacitor

Education

Bachelor of Engineering, Computer Science

2016 – 2020

Rizvi College of Engineering, Mumbai
